The Geologists' Association

OFFICERS AND COUNCIL 1975

President:
D. V. AGER, D.Sc., Ph.D., D.I.C., F.G.S.

Vice-Presidents:
S. C. A. HOLMES, M.A., F.G.S.
JANET WATSON (Mrs. J. Sutton), B.Sc., Ph.D., F.G.S.
MURIEL A. ARBER, M.A., F.G.S., F.R.G.S.
J. G. CAPEWELL, B.Sc., Ph.D., F.G.S.
E. W. AVENT

Treasurer:
M. K. DURKIN, F.R.A.I., F.G.S., 15 Fir Tree Grove, Bredhurst, Gillingham, Kent ME7 3LB.

Secretaries:
General: F. H. MOORE, B.Sc., Ph.D., F.G.S., 278 Fir Tree Road, Epsom, Surrey KT17 3NN.
Field Meetings: MARY E. PUGH, M.Sc., Department of Geology, Imperial College of Science and Technology, Prince Consort Road, London SW7 2BP.
Publications Committee: PEIGI WALLACE, B.Sc., Ph.D., F.G.S., Department of Geology, Imperial College of Science and Technology, Prince Consort Road, London SW7 2BP.

Editor:
A. J. BARBER, B.Sc., Ph.D., D.I.C., F.G.S., Department of Geology, Chelsea College, 271–3 King Street, London W6 9LZ.

Librarian:
J. E. ROBINSON, Ph.D., Department of Geology, University College, Gower Street, London WC1E 6BT.

Other Members of the Council:
Mrs. H. BONE (1973)
A. E. STUBBS, B.Sc. (1973)
P. F. RAWSON, B.Sc., Ph.D., F.G.S. (1974)
J. R. AMPHLETT, LL.B. (1974)
A. C. BISHOP, B.Sc., Ph.D., F.G.S. (1974)
JULIA A. E. B. HUBBARD, B.Sc., Ph.D., F.G.S. (1974)
J. N. HUTCHINSON, B.Sc., Ph.D., M.I.C.E., F.G.S. (1974)
TOM BARNARD, Ph.D., B.Sc., D.I.C., F.G.S. (1975)
PHILIP CAMBRIDGE (1975)
H. C. IVIMEY-COOK, B.Sc., Ph.D., F.G.S. (1975)
E. R. SHEPHARD-THORN, B.Sc., Ph.D., F.G.S. (1975)
S. WHITELEY, B.Sc., F.R.I.C., F.R.P.S., F.G.S. (1975)

Contents

	page
AGER, D. V. The geological evolution of Europe	63
ALLEN, J. R. L. Source rocks of the Lower Old Red Sandstone: Llanishen Conglomerate of the Cardiff area, South Wales	127
ALLEN, P. Wealden of the Weald: a new model...	389
Annual Report of the Council of the Geologists' Association for the Year 1974...	105
BANHAM, P. H., H. DAVIES & R. M. S. PERRIN. Short Field Meeting in north Norfolk, with a contribution by NORMAN PEAKE	251
BANNER, E. T. & M. B. COLLINS. Field Meeting: 'Introduction to Oceanography' at University College of Swansea	87
BISHOP, A. C. & J. T. RENOUF. Field Meeting in Jersey, Channel Islands	247
BRIGGS, D. J. Origin, depositional environment and age of the Cheltenham Sand and Gravel and related deposits	333
BROWN, R. C., D. D. GILBERTSON, C. P. GREEN & D. H. KEEN. Stratigraphy and environmental significance of Pleistocene deposits at Stone, Hampshire	349
BRZOZOWSKI, T. J. Very Low Frequency electromagnetic survey applied to mineralised zones on the north-western edge of Dartmoor, Devon	287
CHALONER, W. G. & MARGARET E. COLLINSON. An illustrated key to the commoner British Upper Carboniferous plant compression fossils...	1
CHARTRES, C. J. & W. B. WHALLEY. Evidence for Late Quaternary solution of Chalk at Basingstoke, Hampshire	365
CROSS, P. & J. M. HODGSON. New evidence for the glacial diversion of the River Teme near Ludlow, Salop	313
DAVIES, F. B., R. L. LISLE & J. WATSON. The tectonic evolution of the Lewisian complex in northern Lewis, Outer Hebrides...	45
DYER, K. R. The buried channels of the 'Solent River,' southern England	239
FREEMAN, E. F. The isolation and ecological implications of the microvertebrate fauna of a Lower Cretaceous lignite bed	307
FÜRSICH, F. T. & T. J. PALMER. Open crustacean burrows associated with hardgrounds in the Jurassic of the Cotswolds, England	171
GRAY, J. MURRAY. The Loch Lomond Readvance and contemporaneous sea-levels in Loch Etive and neighbouring areas of western Scotland	227
HALL, A. & N. J. JACKSON. Summer Field Meeting in west Cornwall	95
HANCOCK, JAKE M. The petrology of the Chalk	499
HANCOCK, P. L. & M. S. ATIYA. The development of en-échelon vein segments by the pressure solution of formerly continuous veins	281
HIGHLEY, D. E. The economic geology of the Weald...	559
HUGHES, NORMAN F. Plant succession in the English Wealden strata	439
KIRKALDY, J. F. William Topley and 'The Geology of the Weald'	373
LAKE, R. D. The structure of the Weald—a review	549
McRAE, S. G. & C. P. BURNHAM. The soils of the Weald...	593

MIDDLEMISS, F. A. Studies in the sedimentation of the Lower Greensand of the Weald. 1875–1975: a review and commentary... 457
MOORBATH, STEPHEN. The geological significance of Early Precambrian rocks 259
NEGUS P. E. & LOUISE BEAUVAIS. The Fairford Coral Bed (English Bathonian), Gloucestershire 183
OWEN, H. G. The stratigraphy of the Gault and Upper Greensand of the Weald 475
RUTHERFORD, K. J. Reworked Palaeozoic and Mesozoic miospores in the Blakeney salt marshes, Norfolk 77
SHEPHARD-THORN, E. R. The Quaternary of the Weald—a review 537
SOWAN, PAUL W. Firestone and hearthstone mines in the Upper Greensand of east Surrey ... 571
STONE, MAURICE. Structure and petrology of the Tregonning–Godolphin granite, Cornwall 155
WEST, IAN M. Evaporites and associated sediments of the basal Purbeck Formation (Upper Jurassic) of Dorset 205
Written Discussion of paper taken as read: Finnmark Caledonides 103

List of Plates

Grey gneiss from an area of low Laxfordian strain showing an L>S mesoscopic fabric defined by clots of hornblendic material ... ... *facing* 56

Grey gneiss containing early (Scourian?) pegmatic layers showing open d_2 folding in the steep limb of a larger stepfold ... ... *facing* 56

Tight d_2 folding of grey gneiss containing an early pegmatite ... ... *facing* 57

Grey gneiss in the flat limb of a large step-fold showing fabric of the type S > L moulded over lenticular gneiss units ... ... *facing* 57

Selection of clasts from the Llanishen Conglomerate ... ... *facing* 70

Exotic pebbles from the Old Red Sandstone in thin-section

Quartz-rich feldspar porphyry with plagioclase phenocrysts, seen in partly doubly polarised light *facing* 70

Feldspar porphyry with pilotaxitic groundmass lacking quartz, seen in partly doubly polarised light *facing* 70

Acid lava in partly doubly polarised light showing early hematite veining and a later quartz veining ... ... *facing* 70

Cleaved acid tuff seen in partly doubly polarised light ... ... *facing* 70

Exotic pebbles from the Old Red Sandstone in thin-section.

Crystal-lithic tuff in partly doubly polarised light ... ... *facing* 71

Coarse lithic sandstone in partly doubly polarised light ... ... *facing* 71

Fine lithic sandstone in partly doubly polarised light ... ... *facing* 71

Pink quartzite in partly doubly polarised light ... ... *facing* 71

Reworked spores from Blakeney Marsh, Norfolk ... ... *facing* 86

The intertidal zone at Black Pill, Gower Peninsula ... ... *facing* 90

Stereo-pair of burrows cast in Araldite, Bathonian, Dagham Downs Quarry, Cotswolds ... 173

Sponges, ectoprocts, and serpulids encrusting crustacean burrows; Foss Cross Quarry, Cotswolds 173

Serpulids encrusting steinkern of *Pleuromya* where cut by crustacean burrow Foss Cross Quarry, Cotswolds 174

Top view of burrowed, bored and encrusted hardground surface of Dagham Stone horizon; Foss Cross Quarry, Cotswolds 174

Bivalve ectoprocts and serpulids encrusting wall of burrow in Quaternary hardground from Umm Shaif, Persian Gulf 174

Corals from the Fairford Coral Bed

Keriophyllia oolitica sp. nov. 201

Adelocoenia microphylla (Tomes) 201

Cladophyllia babeana (d'Orbigny) var. *minor* Beauvais 201

Latiphyllia bajociana (d'Orbigny) 201

Thecosmilia gregaria Duncan non McCoy 201

Montlivaltia fairfordensis Tomes 201

Corals from the Fairford Coral Bed

Isastraea browni (Duncan) 202

Microsolena hemispherica sp. nov. 202

Corals from the Fairford Coral Bed

Paramontlivaltia obliqua sp. nov. 203

Meandraraea slatteri (Tomes) 203

Microphyllia punctata sp. nov. 203

Collignonastaea negusi sp. nov. 203

Coral from the Fairford Coral Bed

Collignonastaea grossouvrei Beauvais var. *digitiformis nov. var.* 204

Examples of veins cut by pressure solution surfaces 284

Contact between chalky rubble and black clay material, Basingstoke, Hampshire 367
'Finger-like' protuberances of clayey material, Basingstoke Hampshire 367
Giant cross-bedded unit in Ashdown Beds Formation. Coast section, *Fairlight Cove, Sussex* 397
Segments of 1 m-long *Equisetites* stems in *East Grinstead Soil Bed*, forming part of minor cycle in *Ardingly sandstone*, 3 m below top of Lower Tunbridge Wells Sand Formation. Philpots Quarry. West Hoathly 398
Pulsatory deposition in giant scoops. Top 2 m Lower Tunbridge Wells Sand Formation at Philpots Quarry, West Hoathly, Sussex 398
Pulsatory deposition in giant scoops. Top 2 m Lower Tunbridge Wells Sand Formation at Philpots Quarry, West Hoathly, Sussex 399
New megafossil specimens collected from the Fairlight Clay of Covehurst Bay, Hastings, Sussex; specimens in the Sedgwick Museum, Cambridge 441
Lamination-bedding in coarse white-chalk. Coniacian Zone of *Micraster decipiens*, Cuckmere, Sussex 509
Low-angle bank in white-chalk, shown up by non-parallel courses of flint. Probably Upper Turonian Zone of *Holaster planus*, 500 m west of lighthouse, Beachy Head, Sussex 509
Lamination-bedding in fine white-chalk. Lower Campanian Zone of *Inoceramus lingua*, Sewerby, Bridlington, Yorkshire 509
Cross-bedded bank in white-chalk, the cross-bedding being accentuated by a paramoudra approximately 1 m high. Coniacian Zone of *Micraster decipiens* 509
Flasers of marl produced by post-depositional solution of calcite. Lower Turonian Zone of *Inoceramus labiatus*, Beachy Head, Sussex 514
Crustacean burrows, some of which have been accentuated laterally by early post-depositional solution, followed by compaction of the sediment. Upper Cenomanian Zone of *Calycoceras naviculare*, Beachy Head, Sussex 514
Marl seam produced by early post-depositional solution, and then displaced by penecontemporaneous faulting. Coniacian Zone of *Micraster decipiens*, Cuckmere, Sussex 514
Rhythmic bedding of alternations of marly chalk and chalky marl (chalk-marl facies). Cenomanian, Beachy Head, Sussex 516
Low-angle jointing in white-chalk—but is it all tectonic? Santonian, near Margate, Kent ... 516
Stylolite in chalk lenticle within marl-seam produced by late stage solution. Santonian Zone of *Hagenowia rostrata*, South Sea Landing. Bridlington, Yorkshire 516
Brown stained chalk pebbles associated with submarine erosion. Turonian, probably Zone of *Inoceramus labiatus*, Beachy Head, Sussex 516
Scanning electron micrographs of chalks at comparable magnifications
Upper Beeston Chalk, West Runton, Norfolk 525
Middle Campanian Zone of *Gonioteuthis quadrata*, East Grimstead, Wilts. 525
Middle Campanian Zone of *Gonioteuthis quadrata*, West Harnham, Salisbury, Wilts. ... 525
Middle Turonian Zone of *Terebratulina lata*, Thornwick Bay, Yorkshire 525
Upper Campanian Zone of *Belemnitella mucronata* s.l., Keady Mountain, Co. Derry ... 525
Fort Hays Limestone, Trego Co., Kansas 525
Area close to the working faces in the firestone mines under Ockley Wood, Merstham, Surrey 578
Dry stone walling retaining 'deads' in the firestone mines under Bedlams Bank, formerly in Chaldon, now in Blechingley, Surrey 578
'Straw' stalactites, about 10–15 cm long, in the firestone mines under Ockley Wood, Merstham, Surrey 579
Calcite formations in the firestone mines under Ockley Wood, Merstham, Surrey 579
Pressure-flaking of a pillar in the firestone mines under the Bedlams Bank–Ockley Wood area on the former Merstham–Chaldon parish boundary, Surrey 582
St. Phillips' Church, Reigate. An example of building in firestone dating from the latter half of the nineteenth century 582
Saxon work in firestone in the south wall of St. Mary's Church, Stoke D'Abernon 585
The hearthstone works of The Reigate Mines Ltd., at Colley Hill, Reigate, about 1930 ... 585
